Overview

With more than 95 percent of the world’s population and 80 percent of the world’s purchasing power outside the United States, future economic growth and jobs for Florida and America increasingly depend on expanding U.S. trade and investment opportunities in the global marketplace.

The following pages feature key facts and figures drawn from new Business Roundtable research, U.S. government data, and other data sources that demonstrate the benefits of international trade and investment to economic growth and jobs in Florida.

Why is International Trade & Investment Important to Florida?

- **International trade, including exports and imports, supports 2.4 million Florida jobs – more than 1 in 5.** These trade-related jobs grew 3.8 times faster than total employment from 2004 to 2013 and are at large and small companies, on farms, in factories, and at the headquarters of Florida's globally engaged firms. *(See Florida Jobs Depend On Two-Way Trade)*

- **Florida exported $59.3 billion in goods and $37.1 billion in services in 2013,** including aerospace products & parts, nonferrous metals, communications equipment and travel services. Of Florida's 61,848 exporters, 95 percent are small- and medium-sized companies with less than 500 workers. *(See Florida Businesses Grow With Exports)*

- **Customers in 225 countries buy Florida-made goods and services,** including billions of dollars in annual exports to top markets like Brazil, Canada and Switzerland. Florida's goods exports have grown three times faster than state GDP since 2003. *(See Florida Companies Export Throughout The World)*

- **Imports lower prices and increase choices for Florida companies and families.** Lower raw material and input costs help Florida companies stay competitive in global markets, while families can stretch paychecks further as trade agreements reduce the cost of products by eliminating costly barriers to trade. *(See Florida Companies And Workers Use Imports To Compete)*

- **Free trade agreements (FTAs) have helped fuel rapid export growth from Florida to partner countries.** In 2013, $21.5 billion of Florida's goods exports, or 36 percent, went to FTA partners. This represents a 101 percent increase since 2003. *(See Florida Needs Trade Agreements To Grow)*

- **Foreign-owned companies invest and build facilities and employ 245,800 workers in Florida.** *(See Foreign Investment In Florida Creates Jobs)*

Florida Jobs Depend on Two-Way Trade

Overview

Creating and preserving quality U.S. jobs is a goal shared by all Americans. With more than 95 percent of the world’s population and 80 percent of the world’s purchasing power outside of the United States, future American economic growth and job creation depend on open markets abroad.

Trade Creates & Supports Jobs in Florida

- Export growth increases jobs by generating new business for Florida's manufacturers, service providers and farmers. Imports support jobs and keep costs low, helping Florida businesses compete and saving Florida families real dollars at the cash register.

- More than one in five Florida jobs depend upon international trade.

- Florida's trade-related employment grew 3.8 times faster than total employment from 2004 to 2013.

- Jobs in U.S. exporting plants pay on average up to 18 percent more than similar jobs in non-exporting plants.

- U.S. exporting plants increase employment 2 to 4 percent faster annually than plants that do not export. Exporting plants also are less likely to go out of business.

- Trade-supported jobs are not just at companies that export and import. Trade supports higher wages for workers and lower costs for companies and consumers, providing them with more money to spend on other things. This spending supports additional jobs throughout the U.S. economy in sectors like entertainment, education and construction.

Florida Businesses Grow with Exports

Overview

Florida exported an estimated $59.3 billion in goods and $37.1 billion in services in 2013. Between 2009 and 2013, Florida goods exports have increased by 29 percent and services exports by 34 percent. Large companies now account for 31 percent of the value of Florida’s goods exports, with the rest provided by small- and medium-sized enterprises (SMEs).

Small & Large Employers Partner to Export

In addition to exporting directly themselves, thousands of American SMEs export indirectly when they sell goods and services to large U.S. exporters. Based on their direct and indirect export activity combined, SMEs represent more than 40 percent of the value of U.S. exports.

Top Florida Exports

- Florida ranks among the top 5 state exporters in 36 industries, including first in pesticides & fertilizers ($2.3 billion), ships & boats ($613 million), misc. wood products ($174 million), and cement & concrete ($87 million).
- Florida is America’s 22nd largest exporter of agricultural products. It is the top exporter of oranges and the second largest exporter of vegetables and melons, citrus fruits (excluding oranges), greenhouse products and strawberries.
- One of Florida’s fastest growing export categories is soaps & cleaning products, which have increased by 15 percent per year since 2003. In 2013, exports of these products reached $1.2 billion.

In 2013, Florida companies sold their products in 225 international markets. Top export markets include:

- **CANADA**
  - Goods Exports: $4.4 billion
  - Services Exports: $3.9 billion

- **VENZUELA**
  - Goods Exports: $3.2 billion
  - Services Exports: $1.0 billion

- **SWITZERLAND**
  - Goods Exports: $3.4 billion
  - Services Exports: $491 million

- **MEXICO**
  - Goods Exports: $2.2 billion
  - Services Exports: $2.2 billion

- **COLOMBIA**
  - Goods Exports: $3.2 billion
  - Services Exports: n.a.

- **BRAZIL**
  - Goods Exports: $5.3 billion
  - Services Exports: $1.7 billion

**Fast Facts: How Exports Help the Florida Economy Grow**

- Goods exports accounted for 7.4 percent of Florida's state GDP in 2013.
- Florida's goods exports have grown three times faster than state GDP since 2003. The average annual export growth during this period was 10.0 percent, while the average annual state GDP growth was 3.3 percent.
- Florida's top export markets for goods are Brazil, Canada, and Switzerland. Its top market for services is Canada.
- Among major export markets for Florida's goods, the United Arab Emirates has grown the fastest at 40 percent per year since 2003. Exports to Hong Kong grew by 19 percent per year, while exports to Colombia grew by 13 percent per year.
Florida Companies & Workers Use Imports to Make Products and Compete in International Markets

Overview

In 2013, 60 percent ($1.3 trillion) of the products imported into the United States were inputs and components used by American producers. Lower cost inputs keep U.S. manufacturing competitive in international markets. Imports frequently contain components (like cotton or semiconductors) and services inputs (like design) provided by U.S. companies and farmers, including companies and farmers in Florida.

- Services, especially transportation from Florida's ports, finance and insurance, marketing and legal services are needed to bring imported goods to American manufacturers and households.
- In 2012, about 75 percent of identified U.S. importers were very small businesses with less than 20 employees.
- Trade and investment liberalization policies save the average Florida family of four more than $10,000 per year.
- Imports help keep prices down for Florida families while increasing their choices for goods and services. Prices for imported consumer goods tend to drop year after year.

In 2012, nearly 186,000 U.S. companies (including 21,703 in Florida) imported products...

And roughly three-quarters of U.S. importers were very small businesses with less than 20 employees.

Imports Decrease Prices for Goods & Services

- **-86.9%** Decrease in the Price of Televisions Between 2003 and 2013.
- **-71.2%** Decrease in the Price of Computers Between 2003 and 2013.
- **-41.9%** Decrease in the Price of Toys Between 2003 and 2013.

Imports Increase Choices for Goods & Services

www.brt.org/trade
Overview

The United States has some of the lowest trade barriers in the world. Overall U.S. trade with our 20 free trade agreement (FTA) partner countries supports 17.7 million American jobs. Trade agreements level the playing field by lowering other nations’ trade barriers, opening up foreign markets to U.S. exports and setting strong, enforceable rules for trade between the United States and those other countries. Florida has increased its exports to FTA partners following implementation of the U.S. FTAs with those countries.

- In 2013, $21.5 billion of Florida's goods exports, or 36 percent, went to FTA partners.
- Since 2003 Florida's goods exports to countries with FTAs in effect with the United States in 2012 have increased by 101 percent.
- Florida's exports to Canada and Mexico have increased by $4.4 billion (198 percent) since NAFTA went into effect in 1994.
- Florida's exports to Chile have nearly tripled since the FTA with Chile took effect in 2004.
- Florida's exports to Colombia of communications equipment have tripled to $726 million in the two years since the FTA with Colombia went into effect.
- Canada and Mexico combined to buy 54 percent of Florida's exports of iron, steel & ferroalloys in 2013.
- Countries negotiating the Trans-Pacific Partnership (TPP) and Transatlantic Trade and Investment Partnership (TTIP) agreements purchased $18.3 billion, or 31 percent, of Florida's goods exports in 2013.
