U.S. EXPORTS FACT SHEET (APRIL 2020)

SOURCES AND CONTACT INFO

About the Data

National goods exports data are “Total Exports” from the U.S. Census Bureau (“Census”), accessed through Census’ USA Trade Online database. Goods data are not seasonally adjusted. The 12-month average trendline helps show whether exports are rising or falling (e.g., it rises if the current month’s exports were higher than exports in the same month during the previous year, and vice versa). Sector-level data are at the 4-digit North American Industry Classification System (NAICS) level.

National services exports data are from the U.S. Bureau of Economic Analysis (BEA), accessed through BEA’s Interactive Data website. Services data are seasonally adjusted. The 12-month average trendline helps show whether exports are rising or falling (e.g., it rises if the current month’s exports were higher than exports in the same month during the previous year, and vice versa). Sector-level data are for the major BEA categories because more-detailed levels are not available monthly. Similarly, the country-level data are only available quarterly, so data reflect the most-recent quarter.

State and congressional districts goods exports data are from The Trade Partnership’s *CDxports* database. *CDxports* reports merchandise export estimates for more than 100 industries to 230 countries as well as services export estimates for more than 30 sectors to over 70 countries and regions for which the U.S. government publishes national export data. It is the only source for state exports of services and district exports of goods and services. *CDxports* improves upon U.S. government data, particularly by allocating bulk agricultural exports (e.g., soybeans, wheat) from port states to grower states. More information about *CDxports*, including detailed methodology, is available at: <https://tradepartnership.com/data/cdxports-and-cdxjobs/>

About The Trade Partnership

The Trade Partnership was founded by Laura Baughman in 1991 to meet a need for a research firm that could apply economic analysis to produce clear, concise and useful information about the impacts of trade policies. Our office in Washington, DC offers locally based trade and economic research services that combine economic analysis with the management of public and legislative outreach.

Research Resources

The Trade Partnership publishes a variety of reports including data updates (e.g., this monthly U.S. Export Fact Sheet), short Policy Briefs on topics of interest to The Trade Partnership staff, and research on behalf of specific clients. To ensure you receive all research updates:
